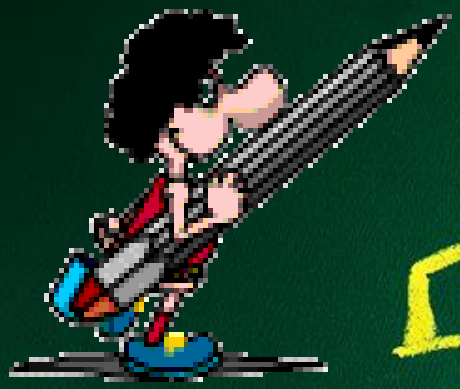
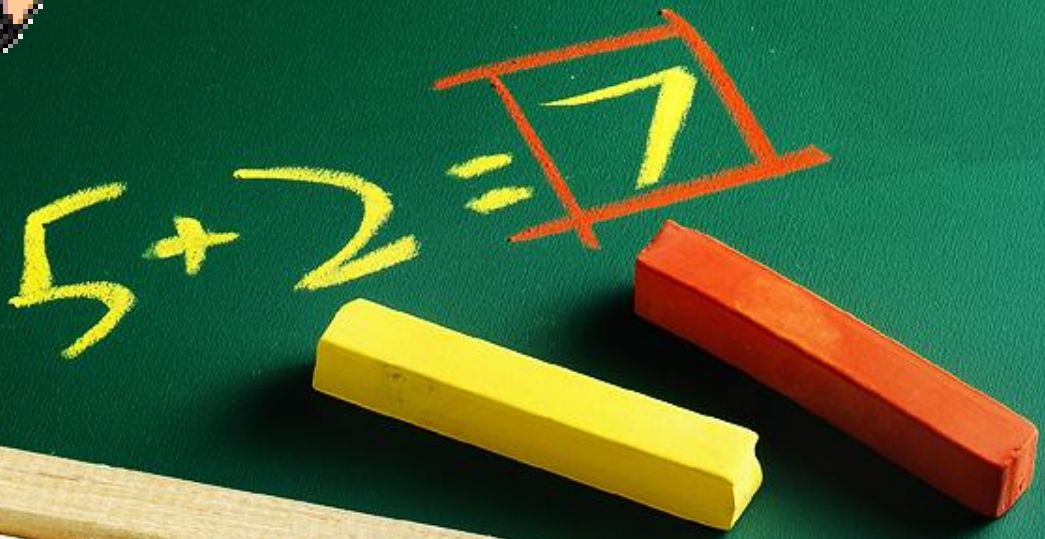
MATHEMATICS

Information for Primary One Parents





Primary Mathematics (Laying a strong foundation)

The Primary Mathematics syllabus aims to enable all students to:

- Acquire mathematical concepts and skills for everyday use and for continuous learning in Mathematics.
- Develop thinking, reasoning, communication, application and metacognitive skills through a mathematical approach to problem solving; and
- Build confidence and foster interest in Mathematics

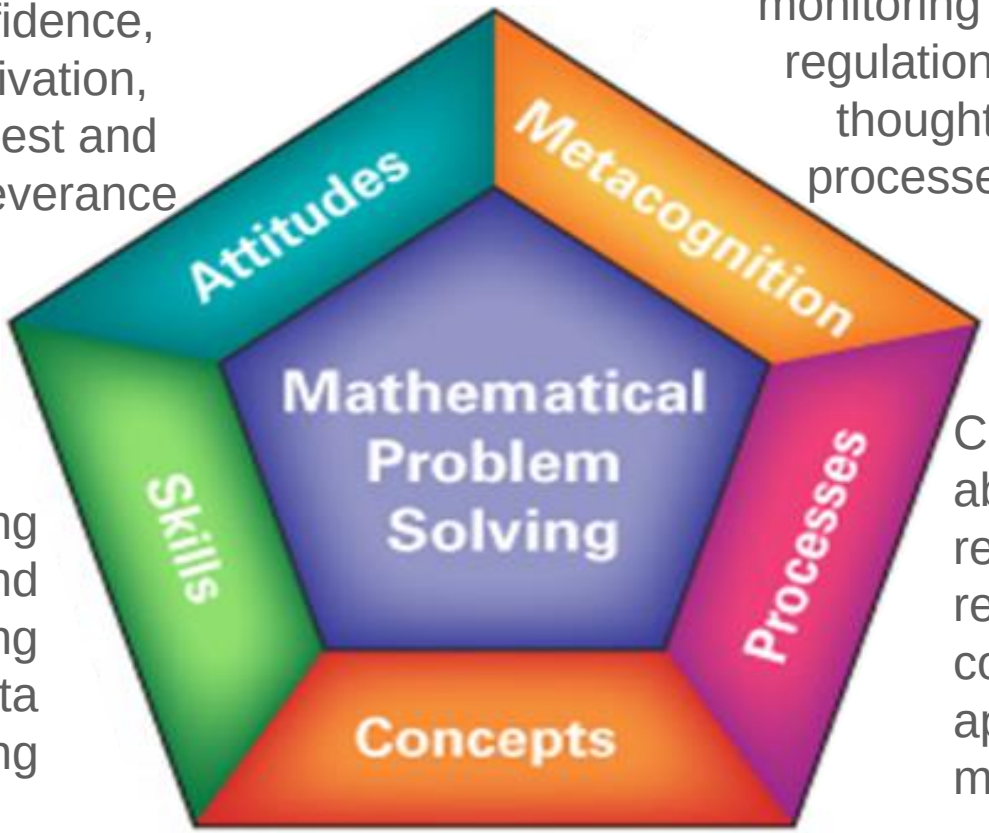
Our Vision

A Creative, Innovative and Effective Mathematics Problem Solver

Mathematics Framework

Belief, appreciation, confidence, motivation, interest and perseverance

Awareness, monitoring and regulation of thought processes



Proficiency in carrying out operations and algorithms, visualising space, handling data and using mathematical tools

Competencies in abstracting and reasoning, representing and communicating, applying and modelling

Understanding of the properties and relationships, operations and algorithms

Syllabus Organisation

The concepts and skills covered in the syllabus are organised along 3 content strands. The development of processes, metacognition and attitudes are embedded in the learning experiences that are associated with the content.

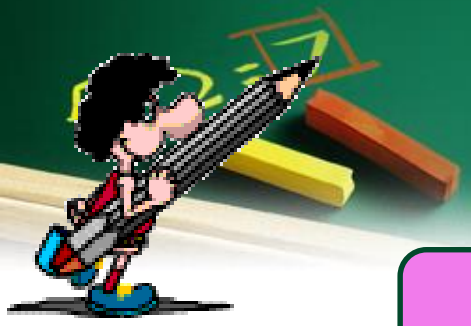
<table>
<tr><td colspan="3">Concept and Skills</td></tr>
<tr><td>Number and Algebra</td><td>Measurement and Geometry</td><td>Statistics</td></tr>
<tr><td colspan="3">Learning Experiences
(Processes, Metacognition and Attitudes)</td></tr>
</table>

Content Sequence

Semester 1	
Numbers to 10 Addition Up to 10 Subtraction Up to 10 Shapes Ordinal Numbers	Numbers to 20 Addition & Subtraction Up to 20 Picture Graphs Numbers to 100
Semester 2	
Addition & Subtraction within 100 Length Multiplication	Division Time Money

Changes in P1 Content

Topics	Changes	Removal
Length	• Non-standard unit of Length ➢ Standard Unit of Length (cm)	
Time	• Use of Digital Clock • Telling time to 5 min	• Use of 'half past'
Shapes	• Half circle and quarter circle (P2 to P1) • Patterns (P1 to P2)	



Learning Outcomes – P1

2021 Syllabus

1. Understand numbers up to hundred
2. Understand addition and subtraction
3. Add and subtract numbers
4. Understand multiplication and division
5. Identify, name, describe and sort shapes
6. Tell time to 5 minutes
7. Measure and compare lengths of objects
8. Read and interpret picture graphs

Phases of Learning

- Learning Environment
- Students' Profile
- Students' Prior knowledge
- Motivating contexts

- Activity-based learning
- Inquiry-Based Learning
- Direct instruction

- Motivated Practice
- Reflective Review
- Extended Learning

P1 Programmes

Primary Mathematics Instructional Programme

To help **students build strong foundation** in primary Math through a structured teaching sequence and supporting manipulatives and materials based on the concrete-pictorial-abstract (CPA) approach.

PI Programmes

Learning Support for Math

- Provide help for students with weak basic numeracy skills
- Students receive more individual attention from teacher
- Students learn through hands-on experiences

P1 Programmes

Integrated Trails

- To experience real-life Mathematics around them

P1 Programmes

Money Sense!

- Able to count amount of money in dollars up to $100
- Understand the value of money
- Build confidence and foster interest in Mathematics
- Reward system
- Make sound decision

Money Sense

TEN DOLLARS
FIFTY DOLLARS
EDUCATIONAL PLAY MONEY
$2
TWO DOLLARS

P1 Programmes

Math Alive

- To provide platforms for students to explore and/ or relate the mathematical concepts that they have learnt at a relational or extended abstract level using real-life scenarios.
- To provide platforms for students to link and integrate the mathematical concepts that they have learnt and contribute to a deeper and more coherent understanding of the concepts.

P1 Programmes

Math Alive

- To provide platforms for students to tap on their prior knowledge to build new knowledge.

Ma Packages

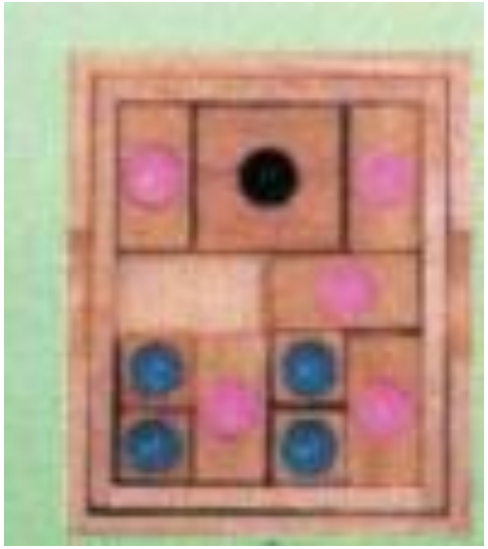
Learning Experiences

- Enhance conceptual understanding through use of the Concrete-Pictorial-Abstract approach
- Communicate their reasoning and connections through various mathematical tasks and activities.

Ma Packages

BrainGames

- To develop the abilities to reason and apply problem solving skills through games



Ma Packages

Reasoning Cartoon

- Develop thinking, reasoning, communication, application and metacognitive skills with the help of our cartoon characters, Chendol, Kachang, Cheng Teng and Cha Cha.

Heuristics (P1-P5)

1. Draw a model/diagram
2. Make a systematic list/tabulation
3. Look for patterns
4. Guess and check
5. Act it out
6. Use before-after concept

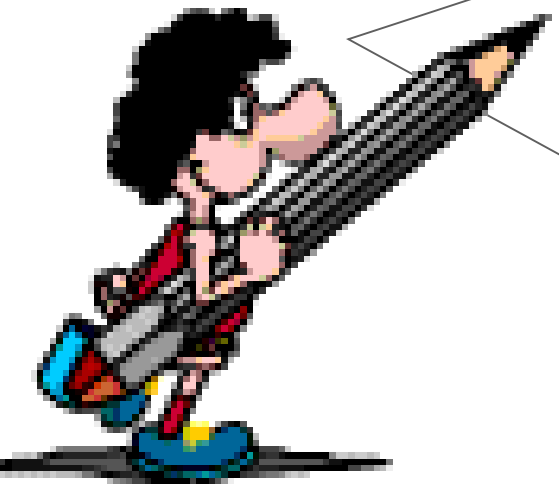
Heuristics (P1-P5)

7. Work backwards
8. Restate the problem in another way
9. Simplify the problem
10. Make suppositions

CPA Approach

Our approach when teaching Math concepts to young children is from ‘Concrete’ to ‘Pictorial’ to ‘Abstract’.

C-P-A Approach



Model Drawing

- To allow students to “see” the word problem in a mathematical way and help them to solve the problem sums

Model Drawing

Concrete Objects

↓

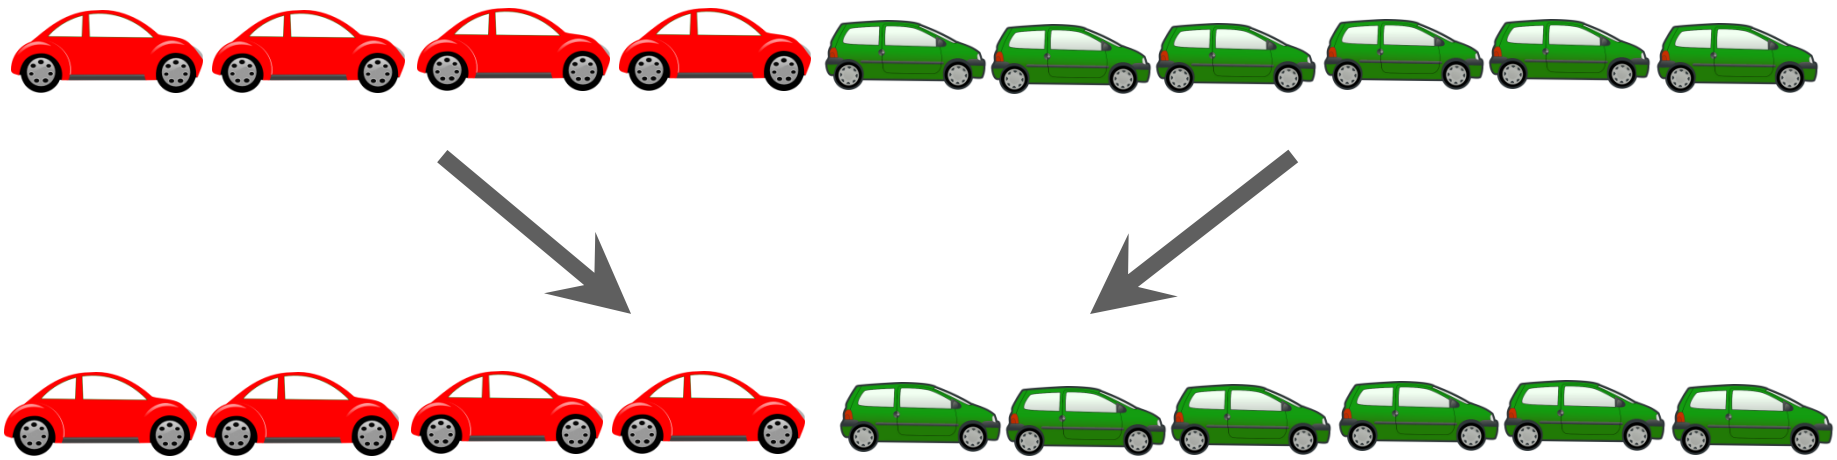
Drawing of Rectangular Bars

↓

Solve Abstract Word Problem

STAGE 1: USING CONCRETE MATERIALS

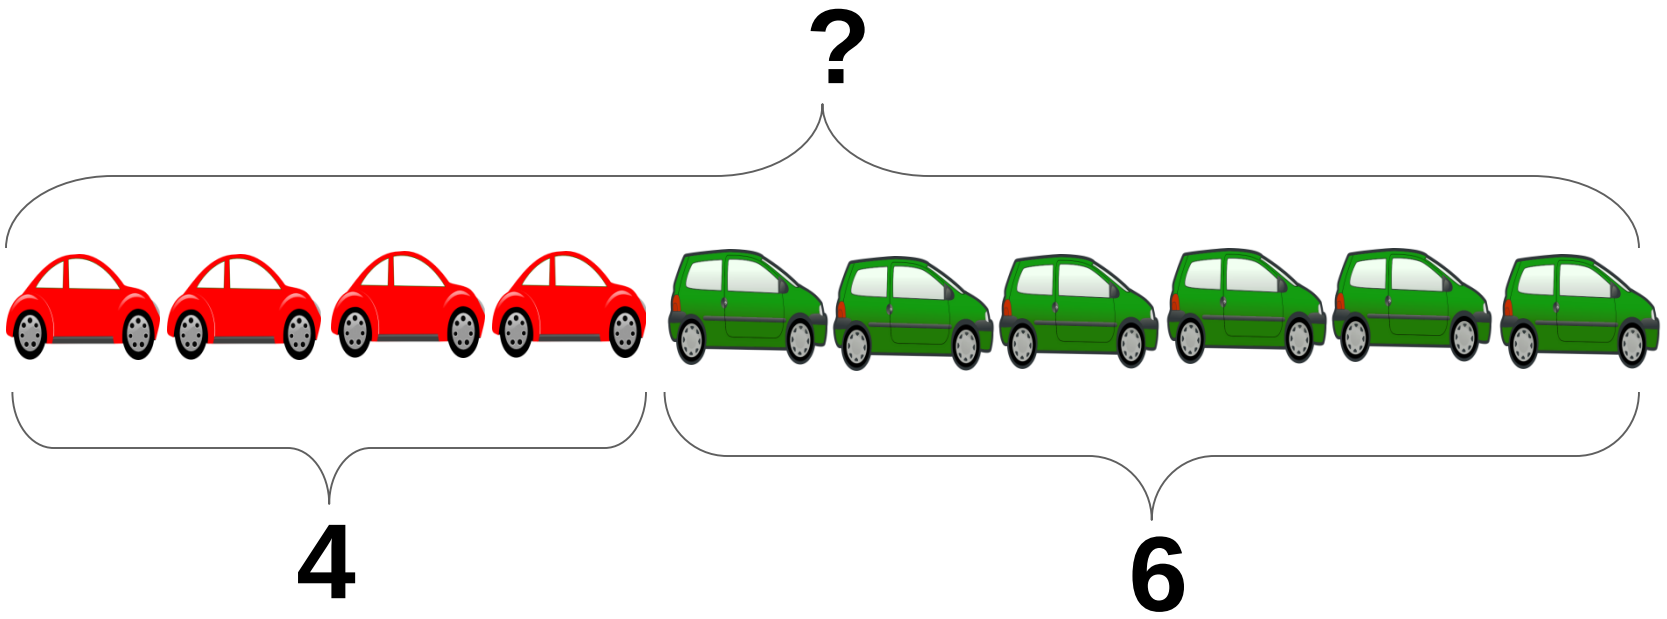
Sam has 4 red toy cars. He buys 6 more green toy cars. How many toy cars does he have now?



4 + 6 = 10

STAGE 2: PICTORIAL REPRESENTATION

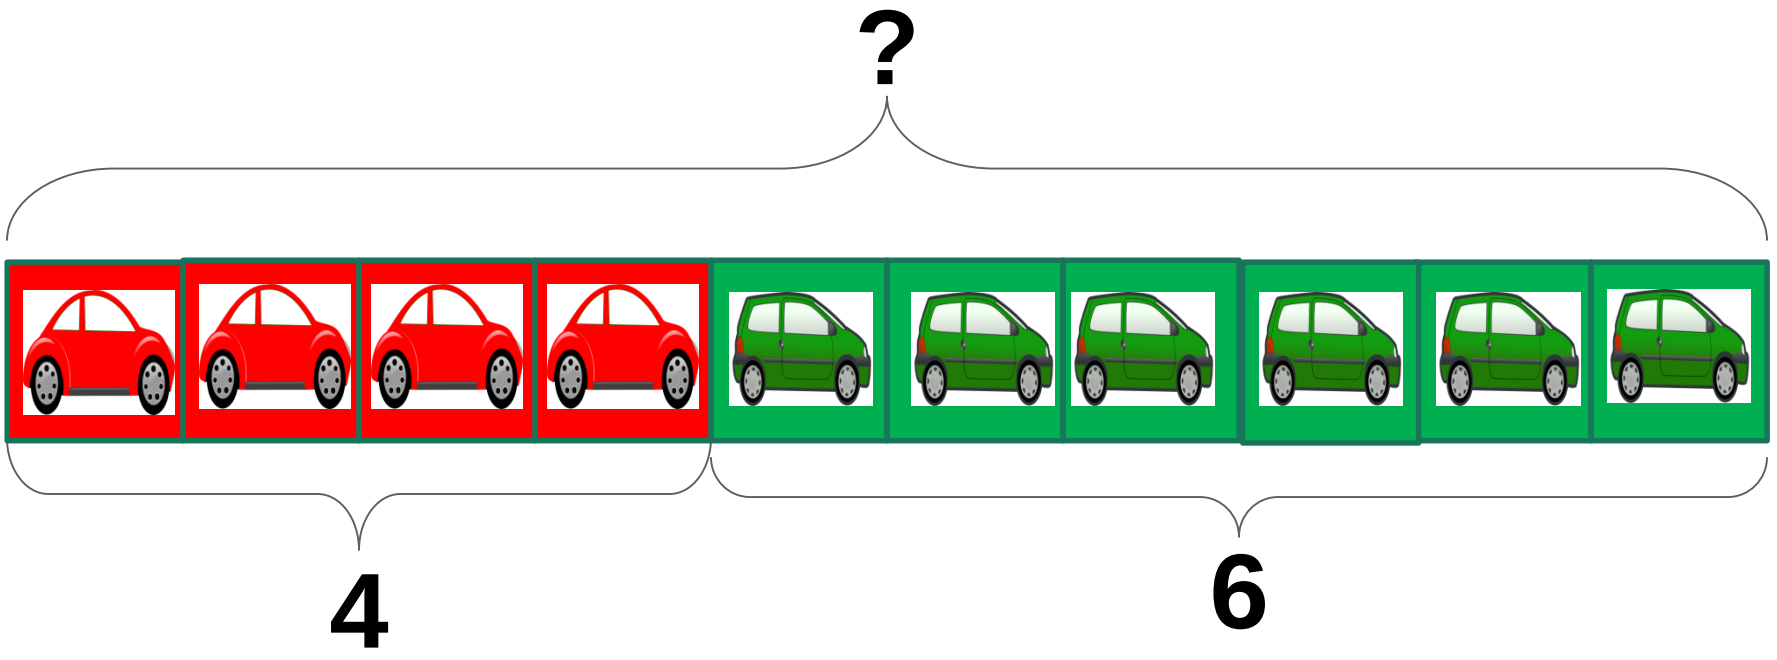
Sam has 4 red toy cars. He buys 6 more green toy cars. How many toy cars does he have now?



4 + 6 = 10

STAGE 3: INSERT BOXES WITH PICTURES

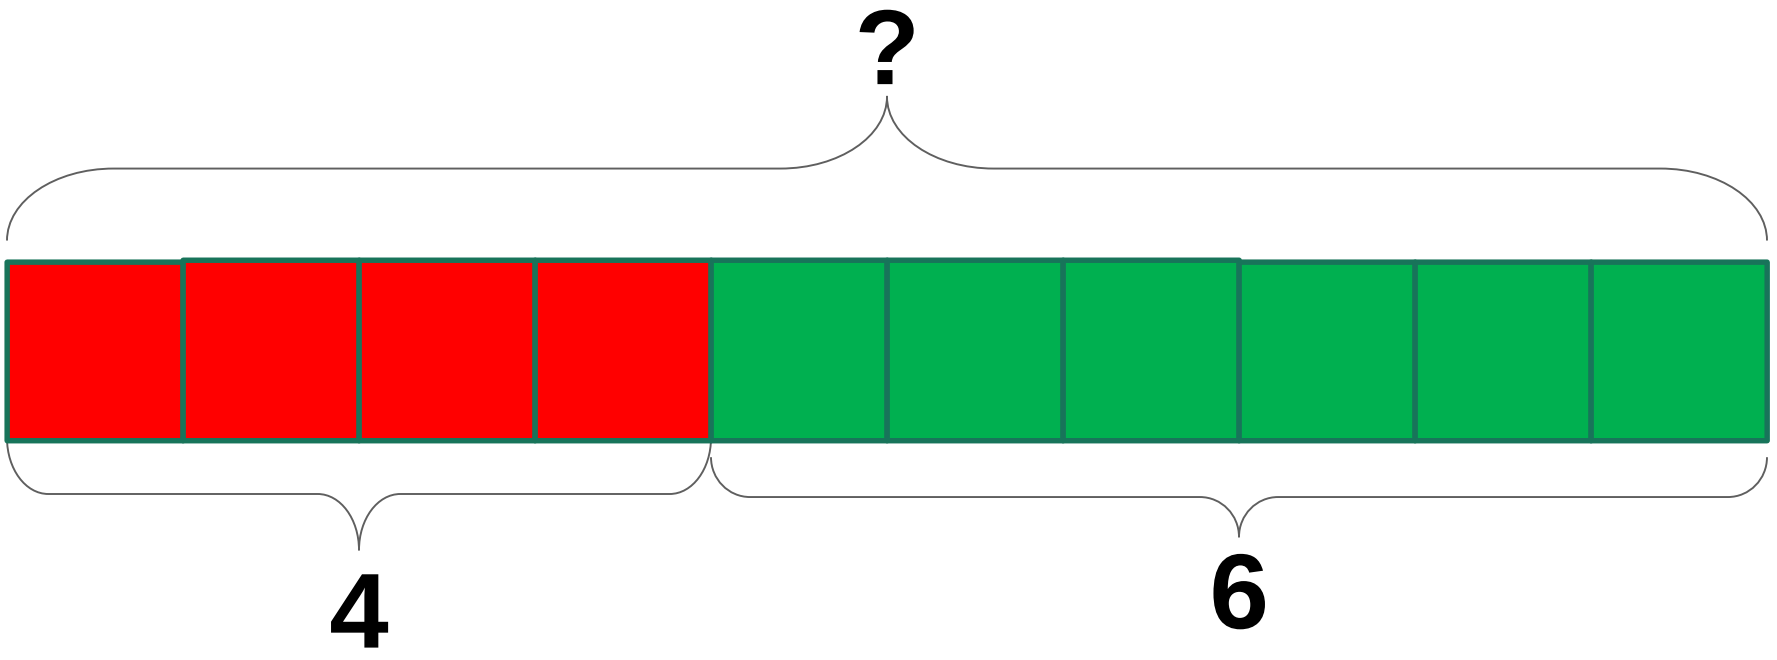
Sam has 4 red toy cars. He buys 6 more green toy cars. How many toy cars does he have now?



4 + 6 = 10

STAGE 3: INSERT BOXES WITH PICTURES

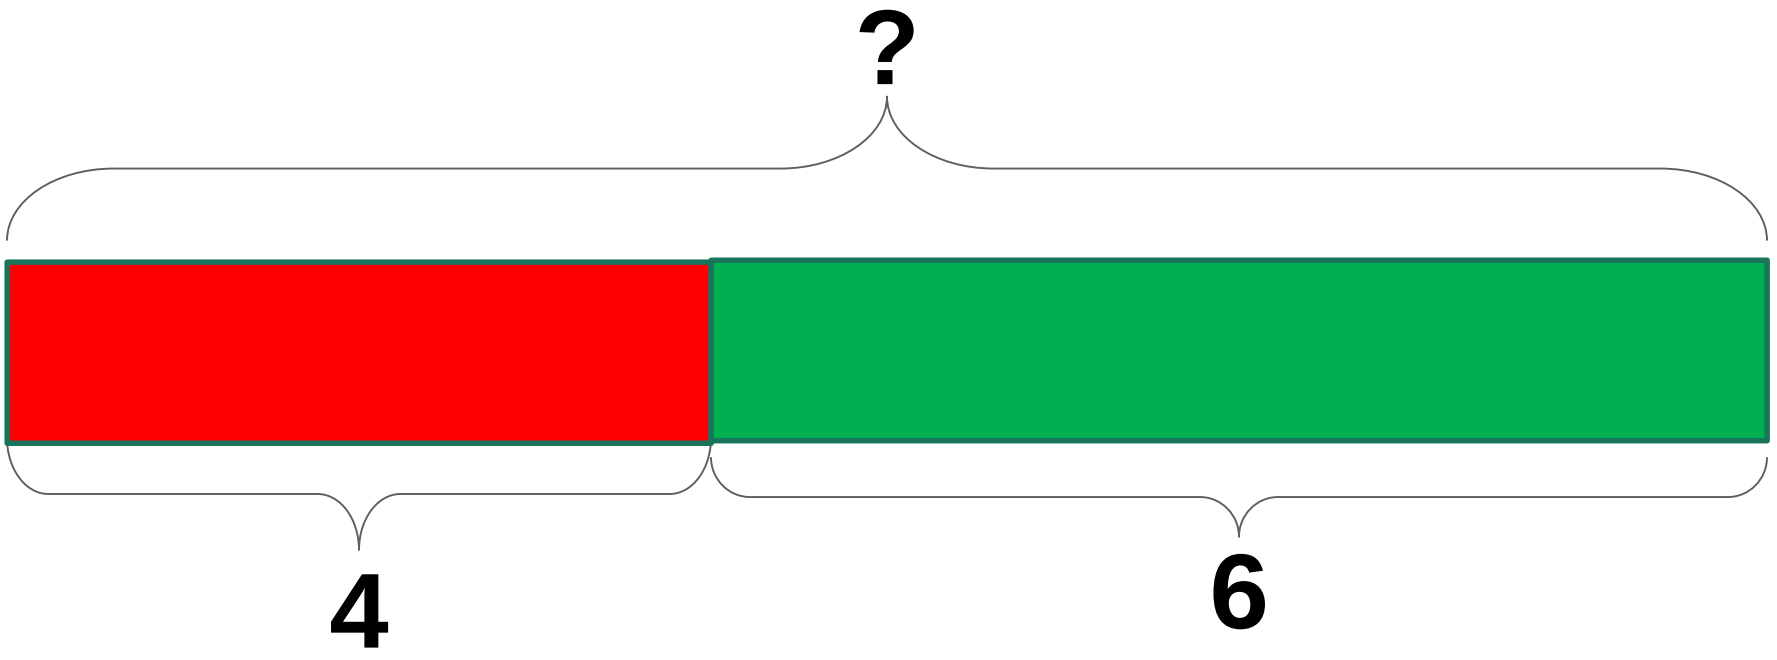
Sam has 4 red toy cars. He buys 6 more green toy cars. How many toy cars does he have now?



4 + 6 = 10

STAGE 3: INSERT BOXES WITH PICTURES

Sam has 4 red toy cars. He buys 6 more green toy cars. How many toy cars does he have now?



4 + 6 = 10

HOW YOU CAN HELP YOUR CHILD IN MATHEMATICS

- Carry out these activities in an informal and fun way
- Having mastered counting, (1 to 20), help your child with the number bonds

of 5 : eg. 1 + 4 , 2 + 3

of 10 : eg. 1 + 9 , 2 + 8

of 20 : eg. 1 + 19, 5 + 15

HOW YOU CAN HELP YOUR CHILD IN MATHEMATICS

- Count with your child, using familiar concrete objects at home, such as toys, spoons, books etc.
- Start with a small number of objects first and then progress to more objects.
- The importance of Math language
